ISO 27001 COMPLIANCE SERVICES

Get started with your ISO 27001 compliance & start managing risks today.

WHAT IS ISO 27001?

ISO/IEC 27001:2022 (ISO 27001) is the standard created by the International Organization for Standardization (ISO) for implementing an Information Security Management System (ISMS) to protect business information assets.

Quite Simply...

ISO 27001 is a framework for managing information security risks which can be used by any business regardless of industry, size or location. It requires the design and integration of security controls into existing business processes to ensure the protection of sensitive data. This is what information security best practice is all about.

“

The Crew helped us prepare for the ISO 27001 audit and made the task manageable. Their guidance and responsiveness ensured that we are able to move quickly with confidence.”

Choose from a variety of consultancy options to help you gain and maintain ISO 27001 compliance.

DISCOVER

This simple service is designed to give you a solid understanding of what is required from your business to comply with ISO 27001. The results indicate the quickest route to a successful certification audit.

ASSIST

This service provides the framework essential for compliance and is ideal for organisations that have operational resources but specifically lack in-house information security risk management expertise.

IMPLEMENT

Our consultants will provide everything you need for your ISO 27001 compliance short of implementing the policies and controls needed and are designed for organisations looking for a cost-effective, turn-key solution. This popular service also comes with our 100% guarantee that you will pass your compliance audit.

At Risk Crew we believe in the rule of measure twice – cut once. Connecting the dots in this way simplifies and streamlines the Auditor's work; providing the essential data needed for the report.

MAINTAIN

Your dedicated consultant will discuss and identify your specific ISO 27001 maintenance requirements. Following this, they then will design a plan to help you meet these needs.

Find out more about each service option

DISCOVER

Are you just getting started?

Risk Crew's Discover service helps you get started in complying with the ISO 27001 standard, our Discover service provides the following deliverables:

- A comprehensive ISO 27001 Compliance **"Gap Assessment"** to identify the "gaps" between your current operations and those recommended by the standard.
- A **Compliance Activities Roadmap** that details the specific remedial actions required for compliance.
- An **Interactive Workshop**, presented by the consultant, with your stakeholders to ensure their understanding.

“

"The gap assessment exercise was perfectly designed and we received real value from it. We didn't know what to expect and were very impressed."

ASSIST

Need a little more help?

Even if your team is already familiar with ISO 27001, you still may feel you need support from an experienced consultant. Our Assist service offers all of the deliverables from our Discover service plus:

- Your dedicated consultant will **Identify, Locate & Classify Information Assets** and create Data Classification & Marking Schemes and an Information Asset Register.
- Next they'll conduct the **Information Threat & Risk Assessment**, create a **Risk Treatment Plan**, and then conduct a **Risk Strategy Workshop with Stakeholders** to Confirm the Organisation's Risk Appetite. **ISMS Documentation Templates** will be provided for your customisation.
- After you have implemented the recommended controls, your consultant will perform a **Mock Audit** to ensure certification readiness.

“

"Risk Crew have helped enormously in overhauling our business' risk management. From testing our systems, highlighting areas to improve on and assisting in helping us achieve compliance with ISO 27001. They have truly transformed the way we work. If you're looking for experts in cyber risk management, Risk Crew is the company for you!"

IMPLEMENT

Need the full belt and braces?

Risk Crew's Implement service offers all the deliverables from both our Discover and Assist services outlined above in addition to the following:

■ A fully **Customised ISMS, SoA, Planning and Policy Documentation** — in addition to specific control recommendations for implementation within the business.

■ Our certified testing engineers will conduct **Network & Website Security Vulnerability Assessment Scanning** and **Network & Website Security Penetration Testing** of your systems, implement an **Information Security Awareness Training Programme** to your staff and conduct an **ISMS Workshop with Stakeholders** to Ensure Understanding, Roles & Responsibilities.

MAINTAIN

Already ISO 27001 compliant?

If your organisation is ISO 27001 certified then you know that once you get compliant the challenge is to — stay compliant. Risk Crew can help you with:

■ Assisting your organisation to meet on-going compliance requirements with a variety of support services from **Conducting Risk Assessments, Internal Auditing, Testing** and delivering **Information Security Awareness Training**.

■ Providing **Continuous Ad-Hoc Advice and Assistance** to answer questions, clarify requirements and ensure you stay the course of compliance.

“

Compared to other Information Security consultancies; the team at Risk Crew understands both threats and governance from a top down perspective and how to efficiently plug in the necessary resources to achieve certification. It was a pleasure to have worked with Risk Crew.”

“

I have dealt with Risk Crew for several years. Their professionalism and attention to detail are second to none and they have a comprehensive and extensive knowledge of all the relevant standards and regulations. They are able to present complex solutions so that they can be understood by staff at all levels. Their training modules are excellent. I would recommend using Risk Crew.”

THE BENEFITS

Achieving ISO 27001 Certification will:

- + Protect against security breaches to avoid reputational damage
- + Strengthen internal processes and set clear goals and responsibilities
- + Enhance global reputation by having an internationally recognised standard
- + Gain a competitive advantage over organisations without ISO 27001
- + Help avoid financial penalties associated with a data breach
- + Easily implement controls that help ensure compliance with business, contractual, legal and regulatory requirements
